Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.135(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1- rejected under 35 U.S.C. 102(b) as being anticipated by each of Boustany et al and Posiviata et al.

Each of the references disclose rubber compositions suitable for tire applications comprising rubber, carbon black and cellulosic materials such as paper in relative proportions such as claimed in the rejected claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5- rejected under 35 U.S.C. 103(a) as being unpatentable over each of Boustany et al and Posiviata et al in view of Saito et al and Corvasce et al.

Each of the primary references teach rubber compositions for tires as discussed above. These references lack explicit recitation of the combination of silica and carbon black, the addition of short fibers and additional powdery cellulosic material.

The reference to Saito et al teaches the benefit of improved tire performance on ice flowing from the addition of a powdered chaff.

The reference to Corvasce et al teaches benefits flowing from the incorporation of a combination of silica, carbon black and short fibers along with a silane coupling agent.

Therefore, nothing unobvious or unexpected is seen to occur from the combination of ingredients of the rejected claims.
